25X1X

1. The Colentina factory, known as the Intrepreindrea Industriala Colentina, Comuna Herastrau, is located in Bucharest on the Sosea Fabrica Glucose 4, a road near the Pipera airfield. The factory employs 600 persons who work three eight-hour shifts per day.
2. The production of the factory is as follows:
  - a. Alcohol (from corn) - 1,000 tons per month
  - b. Glucose - 3,000 tons per month
  - c. Dextrin - 10 tons per month
  - d. Amidin - ( from potatoes or corn) - 10 tons per month
  - e. Ice - 3,000 tons per month for hospital and restaurant use.
3. The factory paid 6,000,000 lei in salaries per month. Seventy percent of the gross income was paid to the State, yet the factory reportedly cleared 4,000,000 lei per month in profits.
4. The power utilized at the factory was supplied by its own 220 volt power plant which was in use fifteen days per month. On other days the factory utilized the Bucharest power station current. The reason for this was that since October 1950, Bucharest has had shortages of electricity; the Bucharest electric power authorities have asked permission to use the Colentina factory power plant for city needs in the event of an emergency.
